DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Election/Restrictions

2. Applicant's election without traverse of Species I, claims 1-3 and 6 in the reply filed on 11/15/2007 is acknowledged. Claims 4, 5, and 7-11 are withdrawn as non-elected.

Claim Objections

3. Claim 1 is objected to because of the following informalities: lines 4 and 5 recites "the edge of the crown portion" and "the edge of the visor". There is no claim antecedent for "the edge". Appropriate correction is required.

Claim Rejections - 35 USC § 112

- 4. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 5. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Regarding claim 3, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of

the claimed invention. See MPEP § 2173.05(d). Also, it is not clear which claim elements are textile or paper. What are "muti-points?" Finally, it is not clear what structure is being recited by "wherein overlapping elements of an overlapping reference point is overlapped to become one point or muti-points".

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 7. Claims 1-3 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Schoen-Wolski (U.S. 2,766,458). Schoen discloses the invention as claimed. Schoen teaches a multi-functional cap including a crown portion 27 formed to cover the head, and a visor 43 extended from a crown portion comprising an assistant visor 44 that is detachably coupled to the edge of the crown portion and edge of the visor. The assistant visor 44 comprises foldable visor units (pleated portions) and fixed units 37-40 for fixing the assistant visor to the crown portion and the visor 43. The visor units of the assistant visor 44 are overlapped when the visor is folded and the visor units can be extended against a plurality of hardened plastic plates or paper plates. The visor units of the assistant visor 44 foldably overlap plate-like body such as textile or paper (col.1, lines 35-37) wherein overlapping elements of an overlapping reference point is

overlapped to become one point or muti-points. Elements 41 and 42 represent visor pinchcock unit and crown pinchcock unit.

Conclusion

8. The prior art made of record on the attached PTO-892, and not relied upon, is considered pertinent to applicant's disclosure.
